DETAILED ACTION

Drawings and Specification

The amendments to the drawings and specification are accepted.

Allowable Subject Matter

Claims 5, 7-9, 11-12, and 14-17 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sakurai (JP Pat 55029843) discloses a laser two-side recorder.

Wade et al (US Pat 6192213) discloses a double-side printing apparatus.

Wiedemer (US Pat 5258809) discloses an electrophotographic printer of modular design.

These references are similar to the claimed invention in that they disclose printing on two sides of a sheet using two rotary drums. Wade et al also discloses fixing the two sides using light. Wiedemer, unlike Sakurai and Wade et al, discloses the paper being wound around the drums instead of just contacting the drums.

However, the main difference that differentiates the cited prior art from the claimed invention is that they are directed to electrophotographic printing processes and not ink-jet printing using photo-curing ink. If one of these references disclosed duplex ink-jet printing using first and second rotary drums, the examiner may have considered the art suitable as a base reference for a 103 rejection. As it stands, the examiner feels any motivation to combine ink jet

printing with the systems above would be tenuous at best. The examiner considers that the currently claimed invention is narrow enough to warrant allowability.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
